Introduction

UltraHosting is a leading Internet Service Provider (ISP) of information technology that is committed to providing our customers with the services they need in order to be successful. As a member of American Registry of Internet Numbers (ARIN), UltraHosting must follow the ARIN IP Allocation Guidelines for ISP.

ARIN allocates Internet Protocol (IP) address space within geographical areas including, but not limited to, North America, South America, sub-Saharan Africa, and the Caribbean. ARIN allocates blocks of IP addresses to ISPs for the purpose of reassigning that space to their customers. Because the number of available IP addresses on the Internet is limited, ARIN requires UltraHosting to justify the IP address assignments for its customers.

UltraHosting must provide the current IP address space usage and any future requests that it might make to ARIN. When UltraHosting makes a request to ARIN for additional IP address space, a detailed request must be made to ARIN showing our current usage and plan for additional growth. In turn, UltraHosting's customers are required to provide IP address space utilization information before receiving new or additional IP addresses. The information provided by our customers will then be used for UltraHosting's justification to ARIN. Without this information, UltraHosting would not be able to receive additional IP address space from ARIN to reassign to our customers.

If all requested information by UltraHosting is received, it normally takes 1~2 business days for us to review and approve the request. If approved, it may take another 1~2 business days for you to receive your IP address assignment. Please plan ahead so that UltraHosting can accommodate your current request and future growth.

IP Address Allocation Policy

1. All UltraHosting IP addresses assigned to customers is "non-portable". If a customer migrates their Internet service to another ISP, UltraHosting will reclaim all the IP addresses assigned to the customer.
2. UltraHosting IP addresses will be allocated on an "as-needed" basis.
3. Customers must:
 - (a) show immediate use of 25% of new or additional IP assignment;
 - (b) show use of at least 50% of new or additional IP assignments within 1 year;
 - (c) show use of at least 80% of current IP assignments when requesting additional IP space.
4. UltraHosting reserves the right to request customers to provide IP address utilization.
5. Failure to show proper use of IP allocations may result in UltraHosting reclaiming IP block and enforcing section (7) of this IP Address Allocation Policy.
6. Customers who have received IP block from UltraHosting, and subsequently acquire their own IP assignments from ARIN or any other source, may be required to release all of the IP block assigned to them from UltraHosting within 3 months of receiving their new IP assignments.
7. UltraHosting reserves the right to reclaim any assigned IP addresses to its customers in the following manner:
 - (a) If the customer can show utilization as outlined above, UltraHosting may replace the IP address block with one of at least the same size.
 - (b) If the customer cannot show utilization as outlined above, UltraHosting may replace the IP address block with one of at most the same size.
 - (c) If the customer cannot show any utilization, UltraHosting may reclaim the entire block and will not provide any replacement.
 - (d) Customers who have had all or part of their UltraHosting assigned IP addresses reclaimed, will be given up to a 2 month grace period in order to prepare for the change in IP allocation.

IP Address Allocation Policy and Request Form

I have read UltraHosting's IP Address Allocation Policy and, as a representative of my company, I agree that we will abide by its use and enforcement; I agree that all information provided within the Request Form portion of this document is true and has not been mis-represented.

I understand that violation of any of the above policies may result in UltraHosting assigned IP block being reclaimed.

IP Address Request Form

Immediate Request

1. Number of IP addresses required:
2. This group of IP addresses to be segmented into how many subnets?
3. Please describe how you plan to use the new or additional IP allocation from UltraHosting.
4. Do you have IP space assigned or loaned to you by another ISP or some other organization? If so, please provide the assigned IP space.
5. Please describe your current IP usage and how it is routed to the Internet.
6. Please describe why you would not be able to use Network Address Translation (NAT) or virtual web site hosting technologies in your network to meet your current and future IP needs.
Future IP Allocations
7. Please describe your planned growth to utilize your IP allocation over the next 3 to 6 months.
